PROFESSIONAL SUMMARY

Scrum Master (SAFe 6.0 SSM, CSM) with 12+ years of Agile delivery for US and European clients across telecom, retail, manufacturing and logistics, including Verizon, Adidas, ABB, ADM, Walmart, Target, Costco, The Home Depot, JB Hunt and Kubota. Worked from India with distributed client teams in the US, Germany, Switzerland and the UK. Brings an AI perspective to the Scrum Master role: designs and builds agentic AI tools that take manual work out of delivery and turn team data into decisions. Track record of up to 95% release-plan adherence, 70% less manual testing and 15–25% shorter sprint lead time.

AI INNOVATIONS (AGENTIC AI)

Retro Pattern Analyser — *Python · Streamlit · Claude API* **2026**

- Surfaces recurring impediments across sprints (e.g. “Test environments: 5 of 6 sprints”) and checks whether retro actions really *worked*.
- Uses Claude to return top themes with evidence quotes, likely root causes and three concrete recommendations for the team. Open-source, with a public live demo: github.com/ganeshkumarinspire/retro-pattern-analyser

LinkedIn Post Agent — *Python · GitHub Actions · OpenAI GPT-4o · LinkedIn API* **2026**

- Scheduled publishing pipeline for my LinkedIn series on Agile practice (140+ automated runs); an AI check confirms each post's text matches its visual before it goes live. Code: github.com/ganeshkumarinspire/linkedin-post-agent
